MACIEK DZIAŁO

SOFTWARE ENGINEER

mdzialo05@gmail.com | +48 606-204-018 | Kraków, Poland | Linkedin

SUMMARY

Software engineer with 5+ years of experience building scalable web applications with React, Next.js, TypeScript, and Node.js. Currently driving development on My Tesco, an internal platform used by ~1 million employees worldwide, within a micro-frontend architecture. Own end-to-end delivery of complex features, make independent architecture and implementation decisions, and mentor engineers joining the team.

WORK EXPERIENCE

Software engineer / Tesco Technology **12.2023 - Present**

- Own end-to-end delivery of key parts of the Digital Sickness Absence workflow (Phase 2 & 3) within the absence management domain.
- Design and build complex, production-grade forms and workflows (React Hook Form, Zod) across micro-frontends and API layers (React, TypeScript, Node.js, Express).
- Make independent architecture and API design decisions for the features I own, consulting backend and cross-functional teams where needed.
- Contribute to shared platform libraries and the internal design system, used by ~250 engineers across 20-30 projects.
- Onboard and mentor new engineers joining the team; several are now full members of the organization.
- Support production systems on an on-call rotation (incident handling, Splunk-based debugging)
- Take part in Tesco's discovery centre, interviewing and evaluating early-career candidates for internship and full-time roles.

Front-end developer / Forte Digital **07.2021 - 12.2023**

- Built user-facing features and application logic for two web-based e-learning platforms (education and healthcare domains) serving the Norwegian market, using React and TypeScript.
- Designed and implemented content structures and custom content models in Sanity CMS, enabling non-technical editors to manage platform content independently.
- Built and maintained a reusable component library aligned with product-specific design systems, improving consistency across both platforms.
- Integrated frontend applications with a C#-based REST API, working directly with backend engineers on contract design.
- Owned UI quality and consistency using Storybook and Chromatic, catching visual regressions before release.
- Worked directly with the client on planning, demos and requirements gathering in an international, English-speaking environment.

KEY SKILLS

Core & Architecture: JavaScript, TypeScript, React, Next.js, Node.js, HTML5, CSS3, Micro-frontends, Backend-for-frontend, Component-based architecture, Monorepositories (nx, turbo)
AI & Agentic Coding: Claude, Claude Code, GPT, Tabnine, Copilot
State, Forms & Data: Context API, Redux, Mobx, React Hook Form, Zod, Custom hooks, REST, GraphQL, Axios, Tanstack Query
UI & Testing: Tailwind, shadcn/ui, Storybook, Chromatic, Vitest, Jest, React Testing Library
Databases & CMS: PostgreSQL, MS SQL, MongoDB, Drizzle ORM, Prisma ORM, Sanity, Strapi
Cloud, Infra & Tooling: Vercel, Azure, Cloudflare, Splunk, GitHub Actions, Vite, Figma, Git, Jira

EDUCATION

IT Technician
ZSTIL High School in Żywiec **2016 - 2020**

Bachelor of Computer science
UAFM University in Kraków **2020 - 2024**

HOBBIES

Volleyball, video games, cars, bootstrapped saas business
